SUMMARY

Full Stack Developer with 3+ years of experience modernizing web applications and working with legacy systems. Specialized in transforming loosely defined requirements into robust, maintainable solutions. Currently building my own products applying Domain-Driven Design and hexagonal architecture.

EXPERIENCE

CoNeko · *Software Engineer* · Jan 2026 – Present · own projects

Marketplace - Backend

- Building a B2B2C marketplace for small businesses from scratch, applying Domain-Driven Design with complete separation of application, domain, and infrastructure layers. (Node.js, Express, TypeScript, MongoDB)

Job Portal - Backend

- Developing a B2B IT job portal from scratch to improve candidate-vacancy matching through hexagonal architecture and Domain-Driven Design. (Java, Spring Boot, MySQL, JWT, Flyway)

Tremé · *Full Stack Developer* · Nov 2024 – Dec 2025 · Full-time · Remote

Frontend

- Built with the team a new client version of a legacy low-code platform with dynamic form rendering and offline support. (Svelte, SvelteKit, PouchDB)
- Replaced a legacy desktop application with the team for a modern web interface for laboratory sample management. (Svelte, AG Grid)

QA & Form Management

- Analyzed incidents reported by users in production, generating new form versions that resolved 100% of critical cases in less than 24 hours.
- Adjusted automatic alert processes via RabbitMQ, restoring 100% reliability to critical notification flows.

Backend & Infrastructure

- Implemented data synchronization between CouchDB and legacy backend, resolved blocked RabbitMQ queues, and documented infrastructure during a PostgreSQL migration, reducing developer onboarding time by 50%. (Node.js, Python)

TaxiBarber App · *Frontend Developer (Freelance)* · Jul – Dec 2024 · Remote

- Modernized the full frontend of a mobile app: navigation, forms, dynamic calculations, and API integrations. (React Native)

Westnet · *Full Stack Developer (Internship)* · Jan – Apr 2024 · Remote

- Optimized performance by eliminating a redundant layer (800ms → 450ms) and refactored legacy components (2000+ lines) with centralized state. Additionally, documented the production database by creating a complete ERD (25+ tables). (Redux, Next.js 14, Docker)

LatinAd · *Frontend Developer (Freelance)* · Jan – Oct 2022 · Remote

- Built a real-time FIFA World Cup app with live scores, standings, and match schedule. (Angular)

EDUCATION

Software Development — Institute Manuel Belgrano · 2023–2024

Higher Technical Degree in Programming — UTN Mendoza · 2019–2020

TECHNICAL SKILLS

Frontend: React, Next.js, Svelte/SvelteKit, Angular, React Native, Redux, Zustand

Backend: Node.js, Python, Java, Spring Boot, RESTful APIs

Databases: PostgreSQL, MySQL, MongoDB, CouchDB/PouchDB

Tools: Docker, Git, RabbitMQ, AG Grid, Confluence
